

## DEVELOP YOUR FRONTEND AUTOMATICALLY

Leverage AI to automate Frontend-development with speed and scalability otherwise not humanly possible.

### RESPONSIVE NATIVE

Build premium mobile apps and add native capabilities to engage your customers faster than you ever imagined - using only web development skills.

### CONVERSATIONAL SOLUTIONS

Easily develop Amazon Alexa skills, Google Home apps and Messenger bots; add voice-control intelligent assistant functionality and smartwatch chat apps.

AUTOMATIC  
FRONTEND  
DEVELOPMENT

### BROWSER COMPATIBILITY

Solve browser compatibility issues on desktop & laptop and boost UI and UX - without systems upgrades, APIs or backend intrusion.

### SECURED CLOUD ON SITE

Leverage your applications' current security solutions and use flexible deployment options to secure your cross-channel presence - without additional costs or configurations.

## HOW IT WORKS

Zuznow's **automatic** frontend development platform builds and maintains full and premium **omni-channel** presence, for consumer, partners and employees applications.

Using the Zuznow platform, **web developers** can easily create premium responsive and native apps, apply wearables and conversational UI solutions and solve browser compatibility issues for legacy applications.

Our secure and flexible deployment options, do not require APIs or backend intrusion, which allows you to start your frontend projects TODAY.
